DETAILED ACTION

Allowable Subject Matter

- 1. Claims 1-3 and 5-7 are allowed.
- 2. The following is an examiner's statement of reasons for allowance:

As of record, prior art discloses the act of testing pads that are electrically connected to bumps to avoid damage to bumps. That is, the pads get damaged, but the bumps do not.

However, applicant persuades that the product-by-process KGD is distinguished from other KGD by certain artifacts that appear as part of the product when "thermal stress tolerance tested." By applicant's arguments, and the claim limitations, wire bond connections are used OR solder ball connections are used for thermal stress tolerance testing, such that residual wire bond connections appear disconnected and solder balls remain pristine after thermal stress tolerance testing or residual damage to solder ball connections is visible with bond pads remaining pristine.

Furthermore, applicant's arguments have made clear that applicant's invention can be distinguished from prior art by the meaning of "on the planar KGD surface" which, by applicant's arguments, is a meaning necessarily requiring the word "on" in the phrase "on the planar KGD surface" to mean "in contact on" (see arguments).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Evan Pert whose telephone number is 571-272-1969. The examiner can normally be reached on M-F (7:30AM-3:30 PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Tokar can be reached on 571-272-1812. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
